sales@xetexinc.com

The featured project for February is located in the heart of Times Square NY. The building had four existing Mammoth Ultraline units that needed replacement. The customer was looking for low sound, high efficiency replacement units that would fit the existing footprint and weight. Xetex supplied four rooftop units ranging from 17,000 CFM (100 Ton) up to 36,000 CFM (200 Ton) unit with a whopping 4200 MBH indirect fired gas heater (shown below).

Unit highlights:

- Outdoor Unit with 2" Double Wall mineral wool insulation- 18ga Painted Exterior /22ga G90 Galv Interior
- 36,000 CFM Supply Air
- DX Cooling with 200 Tons Air Cooled Condensing
- 16 Individual Circuits to meet NYC code of 15hp max circuit size
- Indirect Fired Gas Heat (4200 MBH Input— Drum and Tube style x 2)
- Dual Direct Drive Supply Fans
- Vertical 6 Fan Return/Relief Array
- Low sound Ziehl-Abegg condenser fans
- Perforated Liner in Fan Sections (sound attenuation)
- Factory programmed custom DDC unit controls
